

Unimax 1010

P/N: 543-12310-00

The one with temperature-control and a maximum loading capacity of 5 kg

This shaker can be integrated into the modular incubation system, and it is therefore ideal for all temperature-controlled shaking tasks. In addition, it is possible to operate several shakers of this size in one climate chamber. We recommend climate chambers made by Memmert.

With a speed range of 30-500 rpm and an orbit of 10 mm, samples are optimally kept in motion. Time-dependent applications can be performed without any problems by using the timer (max. 999 min).
