

## **Steriliser**

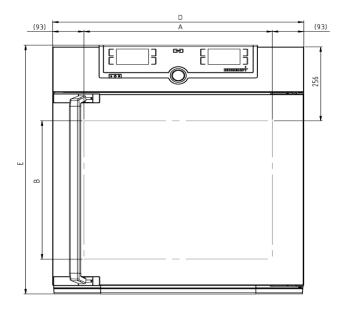

# SN160plus

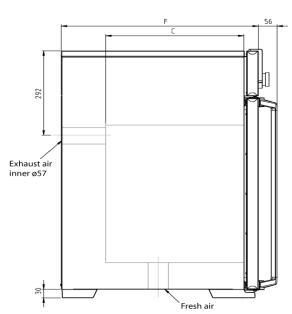

Safer than disinfection, hot-air sterilisation of containers and instruments

The indispensable safety feature for this hot air steriliser: Setpoint Wait. This means that the programme for sterilisation only starts when the set temperature has been reached. This feature can also be used with freely positionable Pt100 temperature sensors. Here the sterilisation time only begins when the set temperature has been reached at all measurement points, and reliable sterilisation is guaranteed at all times.

On this page, you can find all the essential technical data on the Memmert hot air steriliser. Our customer relations team will be pleased to help if you want further information. If you should require a customised special solution, please contact our technical specialists at <a href="mailto:sales@memmert.com">sales@memmert.com</a>.

Temperature	
Setting temperature range	+20 to +250 °C
Setting accuracy temperature	up to 99.9 °C: 0.1 / from 100 °C: 0.5
Working temperature range	at least 5 above ambient temperature to +250 °C
Temperature sensor	2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error
Control technology	
ControlCOCKPIT	TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.
Language setting	German, English, Spanish, French, Polish, Czech, Hungarian
Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days
Function HeatBALANCE	adapting the distribution of the heating performance of the upper and lower heating circuit from -50 $\%$ to +50 $\%$
Function SetpointWAIT	the process time does not start until the set temperature is reached
Calibration	three freely selectable temperature values
adjustable parameters	temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime
Ventilation Convection	natural convection
Fresh air admixture	adjustment of pre-heated fresh air admixture by air flap control in 10 % steps for each segment
	individually
Vent	vent connection with restrictor flap
Vent  Communication	· · · · · · · · · · · · · · · · · · ·

Communication	vent connection with restrictor flap
Communication  Documentation	vent connection with restrictor flap  programme stored in case of power failure  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes
Communication  Documentation  Programming	vent connection with restrictor flap  programme stored in case of power failure  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes
Communication Documentation Programming Safety	vent connection with restrictor flap  programme stored in case of power failure  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating
Communication Documentation Programming  Safety Temperature control	vent connection with restrictor flap  programme stored in case of power failure  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection
Communication Documentation Programming  Safety Temperature control  Temperature control	programme stored in case of power failure  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off

Standard e	aiiinmant
Stanuaru <del>c</del>	uuibiiieiii

Door	fully insulated stainless steel door with 2-point locking (compression door lock)
Internals	2 stainless steel grid(s), electropolished
Works calibration certificate	Calibration at +160°C

## Stainless steel interior

easy-to-clean interior,made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides
161 I
$w_{(A)} \times h_{(B)} \times d_{(C)}$ : 560 x 720 x 400 mm
8
210 kg
20 kg

# Textured stainless steel casing

Dimensions	w <sub>(D)</sub> x h <sub>(E)</sub> x d <sub>(F)</sub> : 745 x 1104 x 584 mm (d +2x56mm door handle)
Housing	rear zinc-plated steel

#### **Electrical data**

Voltage	230 V, 50/60 Hz
Electrical load	approx. 3200 W
Voltage	115 V, 50/60 Hz
Electrical load	approx. 1800 W

## **Ambient conditions**

Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.
Altitude of installation	max. 2,000 m above sea level
Ambient temperature	+5 °C to +40 °C
Humidity rh	max. 80 %, non-condensing
Overvoltage category	II
Pollution degree	2

# Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 830 x 1300 x 800 mm
Net weight	approx. 96 kg
Gross weight carton	approx. 122 kg

# Standard units are safety-approved and bear the test marks
